

CHILDREN ON CAMPUS POLICY

Children of staff and/or students of the University are welcome on campus and are eligible to attend the University Childcare Centres. However, other University buildings have not been designed for use by children. For this reason, if children are brought into the University buildings they must be accompanied and appropriately supervised by an adult at all times. It is important that children do not interrupt learning of students and delivery of classes and lectures. Alternative arrangements for care of children should be made during lecture and class times.
