WELCOME

“

At the heart of our work is a clear belief, that access to education has the power to transform lives and strengthen communities.

It is my pleasure to welcome you to the 2025 AUT Foundation Manaakitanga Impact Report.

This year has been defined by a continued focus on partnership, purpose and impact, as we strengthen the role of the AUT Foundation as the official charity of Auckland University of Technology and expand our contribution to students, communities and Tāmaki Makaurau.

A defining milestone has been the establishment of our partnership with Auckland Foundation. This collaboration reflects a shared commitment to philanthropy that enables opportunity and long-term impact across the region. It brings together complementary strengths to support a more connected, inclusive and prosperous Auckland, with education playing a central role in shaping that future.

As an independent charitable organisation, AUT Foundation exists to mobilise philanthropic investment in support of AUT and its students. Partnerships such as this allow us to extend our reach and deepen our impact, helping to remove barriers to education while creating pathways for students to succeed and contribute to their communities.

We have also continued to strengthen the Foundation’s profile and engagement, ensuring our purpose and impact are clearly understood by those who support and invest in our work. This is essential to sustaining momentum and growing the culture of giving around AUT.

At the same time, initiatives such as our annual Student Support Fund staff campaign continue to build strength, reflecting a shared commitment within the University community to support students facing financial hardship. This growing participation is both a practical and symbolic expression of the collective responsibility we hold for student success.

At the heart of our work is a clear belief, that access to education has the power to transform lives and strengthen communities. Through the generosity of our donors and partners, the AUT Foundation continues to open doors, remove barriers and create opportunity where it is needed most.

Thank you for your continued support and commitment to this work.

Yours sincerely,

Rob Campbell
Chair, Trustee, AUT Foundation

2025 TRUSTEES

The AUT Foundation’s Board of Trustees comprises passionate leaders who bring their expertise and experience to guide the Trust, championing partnerships that accelerate impact and ensure the transformative outcomes for AUT students.

SUPPORTING STUDENTS WHEN IT MATTERS MOST

The Student Support Fund and the impact of giving

For many students, the path through university includes moments of challenge that extend beyond the classroom. Rising living costs, unexpected life events and financial pressure can quickly become barriers to learning, affecting wellbeing, attendance and the ability to continue studying.

The AUT Foundation's Student Support Fund plays a vital role in responding to these moments. Supporting the AUT Student Services managed Student Hardship Fund, it provides fast, practical assistance to students when they need it most. This includes help with everyday essentials such as food, transport and urgent living costs, ensuring students can stay engaged in their studies and continue working towards their goals.

In 2025, this support reached more than a thousand students across the university. A total of 1,129 AUT students received assistance through the fund, with the majority requiring help with the most immediate and essential needs. Food and transport were the largest areas of support, reflecting the day to day realities students are navigating.

For students, this support is often the difference between struggling in silence and being able to move forward with confidence. One student shared,

"This is honestly such a relief and will significantly reduce the financial pressure I'm under. I truly appreciate your support."

Another reflected on the wider impact:

"This support means a great deal and will help me focus on completing my studies without added stress."

The Student Support Fund is particularly significant for AUT's diverse student community, including international students who may be far from home and without established support networks. In times of financial difficulty, access to immediate assistance provides not only practical relief, but reassurance, stability and a sense of belonging within the university.

Joanna Scarborough, Group Director of Student Services and Administration, says the impact of this support is seen every day through the work of the Student Hub teams.

"Our teams work closely with students at critical points in their journeys. When we can provide timely support, it helps relieve immediate pressure and allows students to keep going. We know that education is valuable and worthwhile, and this support ensures students can stay focused on what matters most."

Student feedback reflects the importance of that support. "Support felt very comforting during a difficult time," one student shared. Others spoke of the difference it made to their wellbeing, describing it as "a great financial relief" and "a safe and understanding space" that helped ease stress and uncertainty.

The impact of the fund is made possible through the generosity of donors and the wider AUT community. In 2025, more than \$20,000 was contributed through one off donations and payroll giving from staff, reflecting a strong culture of collective care and commitment to student success.

“

Our teams work closely with students at critical points in their journeys. When we can provide timely support, it helps relieve immediate pressure and allows students to keep going.

JOANNA SCARBOROUGH
Group Director,
Student Services & Admin

Alongside staff giving, the fund has also benefited from the generosity of individuals who recognise the importance of supporting students through moments of need.

Among them is Dr S. Gurushankar, a health administrator and President of the Meenakshi Mission Hospital and Research Centre in India, whose generous contribution has directly supported AUT students facing financial hardship.

AUT Foundation Chair Rob Campbell acknowledged this contribution, noting its meaningful impact.

"We are deeply grateful to Dr Gurushankar for his generosity. Support like this makes a real and immediate difference, helping students overcome barriers and continue their education with confidence."

Through support from donors, the Student Support Fund continues to provide practical assistance when it is most needed. Whether it is help with food, transport or urgent costs, the impact is immediate and tangible.

As demand continues to grow, the need for timely support remains clear. For many students, access to practical assistance at the right moment can determine whether they are able to stay engaged in their studies. The Student Support Fund ensures that when challenges arise, students are not facing them alone.

Donate to AUT Foundation's Student Support Fund today and help AUT students when they need it most

AMOKURA, INVESTING IN FUTURE LEADERS

In 2025, AUT launched Amokura, the Vice Chancellor’s Leadership Programme supported by the McCall MacBain Foundation, investing in excellence and leadership potential among the university’s highest achieving undergraduate students. With founding support from the McCall MacBain Foundation, Amokura reflects AUT’s commitment to growing leaders who combine academic excellence with a strong sense of purpose and responsibility.

Named for the red tailed tropic bird, Amokura symbolises purposeful movement, navigation and resilience. The name reflects the programme’s aspiration to grow leaders who are grounded in their identity and values, confident in charting their own path, and committed to serving others.

AMOKURA INAUGURAL YEAR HIGHLIGHTS (2025)

Supported by the McCall MacBain Foundation

Amokura is distinct in both who it supports and how leadership is understood. Scholars are selected during their undergraduate study, typically in their second year, from a highly competitive pool of academically outstanding students, once academic excellence is clearly established and leadership potential is emerging. Drawn from across the university, this group represents some of AUT’s top performing students, spanning disciplines, backgrounds and lived experiences, united by a shared commitment to making a positive impact.

Rather than focusing on positional leadership, Amokura reframes leadership as values driven and relational. Scholars are supported to reflect on who they are, how they lead and the responsibility that comes with influence. For many students, this broadens their understanding of leadership, strengthening confidence, self awareness and a clear sense of purpose.

Students consistently reflected on the value of learning alongside other high achieving peers in a values led environment. One scholar shared that being challenged by others at a similar level helped them recognise their own leadership potential, while others spoke of a stronger sense of belonging and a deeper appreciation of leadership grounded in empathy, collaboration and service.

Connection and service are central to the Amokura experience. Bringing scholars together from across the university forms a high calibre leadership cohort that supports and challenges one another, while opportunities to engage beyond the classroom reinforce leadership as an act of service. Engagement with national and global leaders further broadens perspectives, helping scholars understand the influence and responsibility that come with excellence.

“

Amokura is about recognising excellence early and supporting students to lead with integrity, cultural grounding and purpose.

PROFESSOR DAMON SALESA
VICE CHANCELLOR, AUT

”

AUT Vice Chancellor Professor Damon Salesa says Amokura reflects a deliberate investment in leadership at a formative stage. “Amokura is about recognising excellence early and supporting students to lead with integrity, cultural grounding and purpose.”

As a two year programme spanning students’ second and third years of undergraduate study, Amokura is designed to deepen impact over time. In 2026, members of the inaugural cohort will step into mentoring roles, supporting new scholars and strengthening a cycle of leadership and peer learning.

The AUT Foundation acknowledges the founding support of the McCall MacBain Foundation and the role of partnership in growing Amokura. As the programme evolves, it presents an opportunity to further strengthen a distinctive pathway for AUT’s most capable students, ensuring sustained investment in leadership, excellence and impact.

SUSTAIN THE FUTURE OF AMOKURA

Amokura is building a high calibre pathway for AUT’s top achieving students, developing leaders who will contribute across Aotearoa and beyond.

Continued support will:

- Strengthen and grow the programme’s long term impact
- Enable more high performing students to benefit from this experience
- Sustain a leadership community built on excellence, service and connection

Partner with us to ensure Amokura continues to grow and lead.

A LEGACY THAT ENDURES

The Keir Trust and a lifelong commitment to AUT students

When New Zealand’s first technical institute was established to meet the growing demands of a rapidly changing technical and technological world, it began as a division of Seddon Memorial Technical College. In 1961, Auckland Technical Institute appointed its founding Principal, Rod Keir. An engineer by profession and an educator by conviction, Rod Keir led ATI through its formative years from 1961 to 1968, helping shape the institution that would later become Auckland University of Technology.

Rod Keir’s contribution to AUT was both professional and deeply personal. He believed in the power of applied education to transform lives and communities, and in the importance of access for those facing financial or social barriers. Alongside his wife Eileen, he embedded those values into the fabric of the university, not only through leadership, but through a lasting act of generosity.

Through the Keir Trust, established by Rod and Eileen, generations of AUT students continue to benefit from their belief in education as a force for equity and opportunity. In an extraordinary commitment to future learners, Rod and Eileen created an endowed fund to support AUT students through scholarships, ensuring their support would endure forever. To date, the Trust has distributed \$1.6m in scholarships and awards, easing financial pressure and opening doors for students from Auckland and across Aotearoa.

The Keir Trust Study Award sits at the heart of this legacy. The award supports students who are facing financial barriers to undertaking tertiary study at AUT, providing both financial assistance and ongoing non-financial support. Recipients are encouraged not only to succeed academically, but to act as role models within their schools, whānau and communities, extending the impact of the Trust well beyond the university.

Support is tailored to student circumstances. For Auckland-based students, the award provides up to \$14,000 over three years. For students from outside the Auckland region, the award covers full first-year accommodation, along with contributions to fees in subsequent years.

In 2025, the Keir Trust Study Award continues to reflect Rod and Eileen Keir’s enduring belief that talent and potential should never be limited by circumstance. Each scholar carries forward a legacy built on leadership, generosity and a deep commitment to widening access to education.

While the Keir Trust remains their most visible legacy, Rod and Eileen’s influence on AUT reaches much further. As Auckland Technical Institute’s founding Principal, Rod helped lay the foundations for the institution’s future growth and success, helping to establish a culture of innovation, industry engagement and accessible education that continues to define AUT today. Eileen was a steadfast supporter of both the university community and the physical environment of the campus. It is said both Rod & Eileen could be found spending their weekend planting trees alongside the Wellesley Street Campus. Together they championed the belief that education could change lives. Their impact can still be seen today, not only through the students supported by their generosity, but in the values of access, opportunity and service that continue to shape AUT.

“

Rod and Eileen Keir believed deeply in education as a pathway to opportunity. Their generosity continues to remove barriers for AUT students and stands as one of the most enduring legacies in our university’s history.

FUJIFILM BUSINESS INNOVATION SUPPORTING AUT TALENT FROM STUDY TO CAREER

Partnerships between industry and education play an important role in shaping the future of Aotearoa, creating pathways for students to move from learning into meaningful careers. AUT's relationship with FUJIFILM Business Innovation New Zealand (FBNZ) reflects this shared commitment, combining practical support with a long-term investment in student success.

A key part of this partnership is the FBNZ "Helping Kiwis work smarter" scholarship, which recognises both academic achievement and future promise. The scholarship helps ease financial pressure, enabling recipients to focus on their studies and aspirations.

For 2025 recipient Warren-Tui Togatama, this support has been transformative. Now in the final year of his Bachelor of Sport and Recreation in Management, he has shaped his university experience around a passion for sport and a desire to build a career that connects people, performance and opportunity.

"I was incredibly honoured and blessed to be named the recipient of the FBNZ Scholarship," he says. "It covered my tuition and supported my living costs, which meant I could focus entirely on my studies without financial stress."

Warren-Tui's journey reflects the impact of supporting talent with potential. Drawn to AUT by its reputation in sport science and strong industry connections, he chose a pathway that would allow him to turn passion into purpose. He now aims to become a sports agent, supporting athletes to succeed both professionally and personally.

"I've seen how passionate the staff are about their industries and how much they invest in helping students succeed. Being part of that environment has helped me grow in confidence and think more seriously about the impact I want to have," he says.

FBNZ's engagement extends beyond scholarships, offering students opportunities to connect with industry through co-operative education placements, leadership initiatives such as Shadow a Leader, and direct interaction with business professionals. These experiences provide valuable insight into the workplace and help bridge the transition from study to career.

David Jupe, Managing Director of FBNZ says, "It's a privilege to partner with AUT who share our commitment to growing the future generation of innovators."

Melanie Barr, Partnerships Director for the Faculty of Business, Economics and Law, says the relationship reflects a strong alignment in purpose.

"This partnership demonstrates what is possible when industry and education work together with a shared focus. FBNZ's support creates meaningful opportunities for our students, helping them build the confidence and capability to succeed in their careers."

As the partnership continues to evolve, it remains focused on creating opportunities that support both academic success and real-world readiness, helping to shape a future workforce that is skilled, confident and ready to contribute. The AUT Foundation is proud to work alongside partners like FBNZ, whose commitment reflects a shared belief in the power of education to transform lives.

JOIN US IN ACCELERATING IMPACT

The AUT Foundation is the official charity of Auckland University of Technology (AUT), dedicated to supporting transformative education through meaningful, sustainable, and equitable partnerships. Together, we create opportunities that break down barriers and build brighter futures – for students, for communities, and for Aotearoa.

YOUR SUPPORT HELPS US:

- 

Support Students – through scholarships, wellbeing initiatives, and financial aid
- 

Deliver Transformational Education – by investing in innovative teaching and research
- 

Remove Barriers – to ensure access and equity for all learners
- 

Create Opportunities – that empower individuals and strengthen communities
